

CCAS-P-350

19" 1U shelf depth 350-415mm, 4 points mounting for 600mm deep cabinets

Adjustable shelf, four-point mounting. Dedicated for installation in 19-inch RACK cabinets from the CCSS (standing) and CCSW (wall-mounted) series. It allows for the installation of devices that do not have RACK profile-compatible housings – inside the cabinet. The four-point design increases the shelf's load capacity. The shelf's adjustment from 350 to 415 mm is done using screws (adjustment is not continuous).
