

WP45X4528BC

MOSAIC standard

2xRJ45 surface-mounted socket kit without RJ45 inserts

securityNET dual-keystone socket for building telecommunications networks, designed for surface mounting. The set includes an angled adapter for two Keystones, a support, a frame, and a surface-mounted box. Individual elements of the set have been selected to meet the expectations of enhanced build quality.

Technical specifications

2xRJ45 surface-mounted socket kit without RJ45 inserts

Dimensions	81 x 81 x 50mm
Color	RAL 9010

MOSAIC, or one standard

The MOSAIC standard is a standardized size of 2x2 inches, or approximately 25x25 mm. Surface-mounted or concealed elements included in the so-called 'white assembly', such as LAN, electrical, and multimedia elements like electrical sockets, telecommunications adapters, or multimedia modules, are made in this standard. This standardized size ensures that the adapter will fit most supports mounted in frames as well as in trunking in surface installations.

45° angle mounting, ensuring performance

The adapter is designed in such a way that the cable, along with the keystone terminated at its end, is mounted at a 45° angle inside the adapter and the box in which we mount the said adapter. The cable inserted at such an angle is not bent, which really affects better transmission parameters in a twisted-pair cable.
