Cable supply rack 800x600x100mm

The 800x600x100 mm cable storage frame is designed for FHAC 330 and 385 series aerial fiber optic closures. This version of the frame with a handle is ideal for storing ADSS cable reserves and also allows for the installation of an FHAC closure in its central part. The frame is mounted on ADSS line poles, with the cable reserve stored on the external arms of the frame. Thanks to its solid construction made of high-grade aluminum, the product ensures durability and resistance to weather conditions.

It is an essential component in aerial fiber optic installations, ensuring order and safety of ADSS cables. Thanks to its robust construction and weather resistance, this product meets the highest standards of quality and reliability.

Technical specifications

Cable supply rack 800x600x100mm

Maximum cable diameter	24mm
Dimensions (H/W/D)	800 x 600 x 100 [mm].
Weight	1.9 kg
Material	High-grade aluminum

Easy installation

The product is designed to be mounted on ADSS line poles for quick and easy field attachment. The rack is lightweight, weighing only 1.1 kg, making installation and handling even easier.

High quality materials

The frame is made of high-quality UV-resistant aluminum, which ensures durability and resistance to weather conditions. The 30x5 mm flat bars ensure the solidity and stability of the structure.
