MOSAIC standard

Red 230V socket key

Universal key to release the lock in a single DATA socket
– enables plugging a device into a dedicated circuit
(e.g., DATA-coded sockets powering computer equipment).

Technical specifications

Red 230V socket key

Type	DATA socket key
Color	red

MOSAIC, or one standard

The MOSAIC standard is a standardized size of 2×2 inches, or approximately 25×25 mm. Surface-mounted or concealed elements included in the so-called ‘white assembly’, such as LAN, electrical, and multimedia elements like electrical sockets, telecommunications adapters, or multimedia modules, are made in this standard. This standardized size ensures that the adapter will fit most supports mounted in frames as well as in trunking in surface installations.
