securityNET

CCSW-0606-06U

19-inch 6U 600x600x370 securityNET wall-mounted rack cabinet

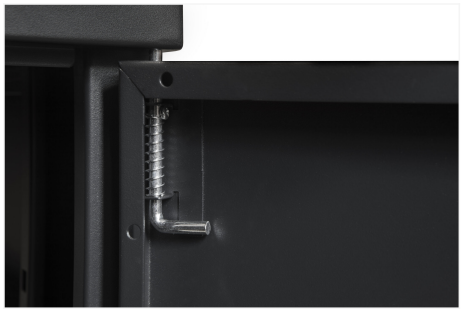

The securityNET line of cost-effective wall-mounted cabinets is designed for organizing small to medium-sized telecommunications and security system installations. They are also suitable for building so-called local distribution points with low cabling density. They are characterized by a specially designed construction that facilitates their installation and daily use, as well as ensures the highest level of safety.

Guaranteed network security

The CCSW-0606-06U cabinet is engineered to provide robust protection for your valuable IT equipment. Its lockable covers, panels, and doors form a formidable barrier against unauthorized access, while integrated grounding ensures protection against electrical hazards. Effective ventilation design minimizes the risk of overheating, ensuring the reliable operation of your critical systems.

Simple installation and easy access to the cabinet at any location

This wall-mounted cabinet offers both security and user-friendly design. Adjustable mounting rails and a convenient mounting bracket ensure effortless installation and relocation. Its thoughtful construction allows easy access from all sides, regardless of placement. Rest assured, your safety is a priority; we've designed it to minimize any protruding screws.
