

CCAS-K5E-UTP-TL

Category 5e UTP RJ45 Keystone Jack (Toolless)

The securityNET Category 5e UTP (Unshielded) toolless keystone is designed for indoor applications. It features a design that allows for cable termination without an LSA punch-down tool. It is used for terminating installation cables in wall outlets and blank patch panels. It is a compatible part of the “keystone” mounting system, therefore it can be used with many outlets from various manufacturers. This product meets the requirements specified by structured cabling standards such as: ISO/IEC 11801, EN 50173, TIA/EIA 568-C.2

Technical specifications

Category 5e UTP RJ45
Keystone Jack (Toolless)

Category	5e
Unshielded	not
Mounting version	Toolless
Mounting type	keystone
AWG range	25-26 AWG
Housing body material	ABS + PC
Connector	Rj-45
PoE standard	PoE/PoE+ (IEEE 802.3af, 3at)

Category 5e compatible, versatile option

Category 5e UTP keystone is one of the most popular LAN components for terminating cable connections. This Category 5e UTP is the most frequently chosen on the market for smaller building installations due to its standardized construction, which ensures user-friendliness.

Tool-less installation, for added convenience

Cable core termination does not require the use of an LSA punch-down tool (Krone blade), which shortens installation time. The module's design allows for easy assembly by hand, meaning it is convenient to install.
