

CCAS-K6-UTP

Category 6 UTP RJ45 Keystone Jack

The securityNET Category 6 UTP (Unshielded) keystone is designed for indoor applications. It is used for terminating installation cables in wall outlets and blank patch panels. It is a compatible part of the “keystone” mounting system, therefore it can be used with many outlets from various manufacturers. This product meets the requirements specified by structured cabling standards such as: ISO/IEC 11801, EN 50173, TIA/EIA 568-C.2.

Technical specifications

Category 6 UTP RJ45
Keystone Jack

Category	6
Unshielded	not
Mounting version	tool
Mounting type	keystone
AWG range	23-26 AWG
Housing body material	ABS + PC
Connector	RJ-45
PoE standard	PoE/PoE+/4PPoE (IEEE 802.3af, 3at, 3bt)

Category 6 compliant, ready for faster transfer

The Category 6 UTP keystone is a fundamental component of an advanced LAN for terminating cable connections. Choosing Category 6 UTP provides us with greater capabilities, as it can support 10 Gbps transmission. The module's construction is standardized and user-friendly.

Tool termination system, classic simplicity

securityNET tool-based keystones require the use of specialized LSA punch-down tools (Krone blade). The classic two-piece design (module + base) ensures simple installation.
